

SAP FIORI – Customized apps to Fiorize every process

At ICE, we are passionate about **designing new and fantastic Fiori apps**, that's why we have a multidisciplinary team that offers best quality in their customized designs for processes and layouts. Our consultants are **officially certified in different Fiori aspects** such as design methodologies, standard Wave-X Fiori apps and custom apps building.

The methodology we follow for the development of custom apps is as follows:

To get the best results, our consultants and developers rely on different methodologies and official tools which have been successfully tested:

Tools to help build a prototype and manage user's feedback and iteration.

Problem solving methodology that helps to center the design of future apps

Process that regularly applies a set of best practices to better work in a collaborative way.

Powerful tool created by SAP that Works in the cloud and provides the necessary elements to develop Fiori apps.
