

SAP FIORI – Standard apps to improve the user experience with SAP

SAP Fiori is a **collection of apps for PC, mobile and tablets** which represent the new paradigm of user experience with SAP. **Out-of-the-box apps which are rapidly deployable** to provide **immediate return of investment**.

SAP Fiori mission: **Simplify your environment throughout design**

¿Why SAP Fiori?

At ICE, we adopted Fiori processes at an early stage (since its official launch in 2013) until today, we have made many Fiori implementation projects, with minor adaptations and Plug & Play, going live within a few weeks and with low effort in change management, thanks to this projects our customers have experienced the following benefits:

Productivity

User adoption

User errors throughout the process

Training costs
