

Over 1,800 KPS **end-to-end Process Chains** integrating Operational and Administrative Enterprise Resource Management, e-Commerce & Customer Management

KPS consultants leverage continually **updated catalogs of best practice processes**, which are already linked with **state-of-the-art standard software solutions**. This enables your strategic and operational goals to be transferred directly to **tried-and-tested processes** and systems, minimizing cost and risk for you.

Our Project Management approach is based on industry standards like PRINCE2 or PMI, and has been enhanced based on **KPS's Rapid Transformation** approach, especially with regards to:

- ✓ Considering **end-to-end Integrated Process Chains (IPCs)** as the ultimate delivery object;
- ✓ Focusing on **client participation** and approval;
- ✓ Enabling a **value-driven project reporting** (Earned Value Analysis (EVA)), considering maturity levels of Integrated Process Chains.

Day to day management of the project to enable an in-time , in-budget and in-quality delivery.
